

JOSHUA HAWKSWORTH

+44 7999 577194 | joshuahawksworth@me.com

Salford, Manchester
7 Bankside Boulevard, Apt. #404

Senior Mobile Developer with 7 years building React and React Native applications. Currently building AI-driven solutions on the Innovation team at ArcusFM, including a React Native app that helps field engineers complete their day-to-day work orders. Previously led development of an email management platform for architects, architecting a monorepo that connects Outlook with SharePoint, and built a mobile loyalty app that gained 150K users in its first year. Experienced in TypeScript, Microsoft Graph API, establishing CI/CD and testing practices, and mentoring developers.

SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, PHP
Libraries & Frameworks: React, React Native, Expo, Bootstrap, Swift, Node, Angular, VueJS, NestJS, NextJS, Jest, Vitest, PHPUnit, jQuery
Tools: Git + Github, Postman, Figma, Vite, Adobe Suite, Microsoft 365, Docker, Jira, Azure DevOps, Azure Portal, LLM APIs

WORK EXPERIENCE

ArcusFM	Remote
Senior Mobile Developer - Innovation Team	November 2025 - Present
- Built a React Native mobile app that helps Arcus engineers complete their day-to-day work orders in the field - Designed and delivered AI-driven solutions as part of the Innovation team, embedding LLM-powered features into engineer workflows - Led the mobile architecture using TypeScript, Expo and React Native, from initial prototype through to production release - Collaborated with engineers and operations stakeholders to define requirements and iterate on UX for on-site use - Integrated the app with backend work order services, handling authentication, state management and data caching - Established CI/CD pipelines, automated testing and release processes for iOS and Android builds - Mentored developers and conducted code reviews to maintain code standards across the Innovation team	
CMap Software	Manchester, Salford
Senior Frontend Software Developer - CMap Mail	March 2024 - October 2025
- Architected and maintained a monorepo containing four interconnected applications - Developed an Outlook Add-in enabling users to file emails directly into SharePoint sites via Microsoft Graph API - Built a discovery web app using TypeScript and React.js for email retrieval and management - Created an Admin portal for project migration and user management across SharePoint sites - Engineered an install web app for automated SharePoint hub site provisioning, including search schemas, site designs, and granular permission management - Designed intuitive UI/UX workflows in Figma across all four applications - Established CI/CD pipelines and TDD practices across the team, reducing deployment time by over 35% and regressions by almost 60%	
17 Oranges	Remote
Frontend Mobile Developer - Kwando	February 2023 - March 2024
- Designed and implemented UI/UX workflows for iOS and Android devices - Participated in workshop sessions with customers to define product requirements - Utilised Expo, React Native, and TypeScript to build, deploy, and maintain app versioning - Established Git workflows and deployment processes - Managed application state and data caching for optimization purposes - Created API service modules for REST endpoint consumption - Designed and documented API endpoint requirements in collaboration with backend developers	

The Access Group

Remote

Web & Mobile Developer - Orderbee

September 2022 - February 2023

- Developed features for Orderbee's web application using VueJS and TypeScript, working with other Frontend developers
- Built mobile functionality for Orderbee using React Native within a separate mobile development team
- Participated in daily standups, sprint planning, and retrospectives following Scrum methodology with both teams
- Coordinated development workflows through Azure DevOps
- Prioritized triage issues to maintain a smoother user experience and development cycle
- Delivered features in iterative sprints while managing parallel workstreams

The Drawing Room Creative

Remote

Mobile Developer - The Original Factory Shop app

December 2021 - September 2022

- Architected and implemented a loyalty badge system with reward and referral mechanics
- Created an interactive daily scratchcard game to drive user engagement
- Integrated a push notification system using Firebase for real-time user updates
- Collaborated with the backend team to implement our microservices architecture
- Mentored junior developers and conducted code reviews to maintain code standards
- Developed, deployed, and maintained the TOFS application on both iOS and Android using React Native
- Worked under tight deadlines in a high-pressure agency environment
- Successfully onboarded over 150K users within its first year of launch

Langley Foxall

Stafford, Dyson Way

Web & Mobile Developer - CicloZone

April 2021 - December 2021

- Developed Laravel-based CMS solutions for a diverse range of clients, including osteopathy clinics and a door manufacturing sales company
- Contributed to React Native app development with Bluetooth connectivity for exercise bikes
- Designed and implemented RESTful APIs using PHP Laravel
- Worked on a Laravel-based video content management system for bike workout videos
- Practiced pair programming to ensure code quality and knowledge sharing

eDynamix

Derbyshire, Pride Park

Junior Web Developer & Designer - Web Master

October 2019 - April 2021

- Developed Web Master, a CRM platform for car dealership website creation and management
- Designed and implemented UI/UX workflows for the Web Master CRM interface using Laravel
- Built a custom WordPress plugin as an early prototype of Web Master using jQuery
- Maintained and updated existing dealership websites through the CRM platform

EDUCATION

University of Derby - Upper Second-Class Honours

September 2016 - September 2019

Computer Games Programming BSc. Hons
